Dublin, Aug. 22.—The home-rule league had a demonstration at the rotunda last night. Only four members of parliament were present, Parnell the most notable. The body of the hall was crowded with workmen. The proceedings throughout were riotous and remarkable for the hostility towards the moderate section of the home rule party.

THE SITUATION CRITICAL.

Washington, Aug. 22.—The United consul at Quebec says five and a half millions of capital have been wholly wiped out by the failure of the Consolidated Exchange and Ville Marie Banks, besides the loss to depositors and bill holders of about half a million more; but worse than all the condition of the working classes.

During the past winter there was scarcely any employment, and it is estimated that there are not less than 7,000 workmen out of employment in Quebec and suburbs. The controversies about the distribution of the small amount of work to be done culminated on the 15th. It is entirely a question of bread, and as representation does not feed the hungry, the situation is anything but agreeable.

"THE SENTINEL'S" PLATFORM.

No single member of the council will be permitted to "run" this enterprise to suit himself, or to bulldoze the council or the board of water works trustees, nor will he be permitted to gratify his personal malice at the expense of the people. That might just as well be understood now as hereafter.

As Mr. WILLIAMS remarked, "water power would be the rule, steam the exception."

AMONG Mr. WILLIAMS' recent deliverances on the question of water works was one to the effect that our probable consumption of water will not reach 1,500,000 gallons for fifteen years at least. If that is the case, our water works are likely to prove a costly burden. But Mr. WILLIAMS may be mistaken. Four years ago he said: "In the discussion of this question eight years ago, 1,000,000 gallons per day was assumed to be sufficient, yet looking to our future growth and the variety of purposes to which water can be applied, there should be our command 5,000,000 gallons."

The statement that the city could ever have purchased the canal for \$20,000 or \$25,000 is false. The statement that when the city thought of buying it, she had no idea of building water works is false. The statement that for several years past the city has been at the mercy of a "soulless corporation" is false, inasmuch as the "soulless corporation" referred to has not yet received one cent for the use of its water by the city. The statement that the income from the canal amounts to \$9,000 or \$10,000 per year is (as we are credibly informed) false. In fact, so far as we have observed, all the assertions upon which the advocates of steam power base their arguments are false.

The Gazette is decidedly mixed on the power question, as will be seen from the following extracts from its issues of to-day and one week ago to-day:

[Friday, August 16.]
In the discussion, the vote was taken on taking place in favor of water works. The city on the water. The "COOK" works matter there plan, which was that is a tendency to drag a reservoir be in a question that is instructed in the preliminary. If the water and the subject of power is water supply obtained through temporary means, it is the work will be a property, and the cost more expedient the pumping power. It is a question that should not arise until the proper time.

It will be seen that only one week ago the Gazette said the agitation of the question of power was premature, that it "should be dropped temporarily," and that it "should not arise until the proper time," again, that it "will come up at the proper time, and any vexatious delay on that subject will be culpable," in all of which the SENTINEL agreed with it. But to-day the Gazette says that the Cook plan provided that the pumping be done by steam. The morning luminary seems not to know its own mind, and to be as contradictory and unreliable in its deliverances upon this subject as Mr. WILLIAMS, from whom it doubtless draws its inspiration.

The Gazette says the SENTINEL is in favor of using the St. Joe River as a source of supply for water works. Perhaps the Gazette will be kind enough to quote some expression by the SENTINEL to that effect. The Gazette is probably thinking of Mr. WILLIAMS who, in a letter to the common council, said:

I am aware that some projectors of water works for Fort Wayne, notwithstanding the formation, have supposed it only necessary to sink large wells a few feet below low water mark and the whole supply would flow in by natural action. I, therefore, think we should fall to find a large supply of water in wells along any of our rivers. No doubt some water would be received for a time into a well twenty feet in diameter, with arched conduits connecting with it. Such supply, however, so far as it comes from the riverbed, must soon cease, because the water in the riverbed is not a permanent source. The sediment in the riverbed is not a permanent source. The sediment in the riverbed is not a permanent source. The sediment in the riverbed is not a permanent source.

SPECULATION. Since the creation, it is estimated that 27,000,000,000,000,000 have lived on the earth. This sum divided by 27,844,000, the number of square miles, gives 1,314,522,086 to a square rod and 5 to a square foot. Suppose a square rod be divided into eleven equal parts, each part would contain 118,583,827 persons. But this is speculation, and of no benefit to the 1,000,000,000 people that now exist, 500,000,000 of whom are invalids, 33,000,000 dying each year. What they most want are the facts concerning Dr. Pierce's Family Medical Discovery for years his standard remedy for the cure of all scrofulous, throat and lung diseases, and for the cure of all diseases and weaknesses peculiar to women. For full information, see the People's Common Sense Medical Adviser, published and sold everywhere, price (post-paid), \$1.50. Over 100,000 copies sold. Address the author, R. V. Pierce, M. St. Johns, N. B., Aug. 21.—Reports continue of the great damage done by the storm, and in many parts travel is almost suspended, the bridges being swept away. A boom of 15,000,000 feet of logs at Miramichi was broken up and must be refitted at heavy expense.

More than a dozen policemen are on trial now for trespassing on private premises, clubbing, striking, illegally arresting and committing other offenses against the person and property of citizens of New York.

Mississippi City, Aug. 21.—R. B. Pearson, superintendent of public education of Harrison county, killed John D. Conkerton, of New Orleans, this afternoon. They quarreled about a drink. Conkerton claiming that Pearson had not paid for his (Pearson's) horse.

He invited any one that wanted to fight him to come out of the bar room. Conkerton advanced on Pearson, and the latter drew a pistol and fired. Conkerton started to run, when Pearson fired again. Upper Sandusky, O., Aug. 21.—Quite a sensation was created here this morning from a rumor on the streets that the dead body of an infant had been found by some boy in a barn. While for over a quarter of a century, Dr. Sage's Catarrh Remedy has been unrivaled as a positive cure for catarrh. The testimony of thousands of ladies has been published, certifying that Dr. Pierce's Favorite Prescription positively cures the diseases and weaknesses peculiar to women. For full information, see the People's Common Sense Medical Adviser, published and sold everywhere, price (post-paid), \$1.50. Over 100,000 copies sold. Address the author, R. V. Pierce, M. D., Buffalo, N. Y.

"You Don't Know Their Value." "They cured me of Ague, Biliousness and Kidney Complaint, as recommended. I had a half bottle left which I used for my two little girls, whom the doctors and neighbors said could not be cured. I am confident I should have lost both of them one night if I had not had Hop Bitters in my house to use. I found they did them so much good I continued with them, and they are now well. That is why I say you do not know half the value of Hop Bitters, and do not recommend them highly enough." B. Rochester, N. Y.

As a cool, pleasant and healthy beverage, we think that the Rhen's Natural Mineral Water is pre-eminently the best. It is without doubt one of the finest natural table waters known, and is mixed with wines, brandies or fruit syrups it forms a drink that is much approved of at the clubs. For sale by druggists, grocers and liquor dealers generally.

Cured of Drinking. "A young friend of mine was cured of an insatiable thirst for liquor, which had prostrated him, and he was unable to do any business. He was entirely cured by the use of Hop Bitters. It allayed all

by leading members have been prepared for reading. The temperance camp meeting at Lawrence, Kas., attended by 10,000 people. Among the speakers are Gov. St. John, of Kansas, Francis Murphy and others.

Charles W. Parker, the construction keeper at the Charlestown navy yard, has been discharged, on the ground that his accounts show a serious irregularity.

The soldiers' reunion at Aurora, Ill., is attended by an immense crowd. Gen. Logan made a speech on Thursday afternoon, after which there was a sham battle and skirmish fighting.

The New York banks paid into the sub-treasury Thursday, 750,000 legal tenders on account of 4 percent bonds. The steamship Abyssinia from Liverpool, brought \$250,000 of gold bars.

The committee on the revision of the rules of the house of representatives has nearly completed its labors. The present revision will present a complete modification of rules in a correct classification and simplification in a codified form.

Assistant Attorney-General Freeman advises the postmaster general that postmasters should not be requested to testify in judicial proceedings as to who rents a box in his office, who took letters from it, etc., tending to show what became of certain correspondence.

The committee on trade, of the New York Produce Exchange, to whom was referred the subject of general adoption throughout the country of the centimetal system after October 1st, continue to receive communications, both in this country and Europe, supporting the exchange in the new movement.

The assignee of the suspended banking firm of G. H. Bussing & Co., of Cincinnati, makes a statement of the firm's condition as nearly as it could at present be ascertained. He gives the total liabilities at \$114,086.25; assets, \$105,609.12. Among the assets is some Chicago property, upon which no estimate value has yet been placed.

Geo. H. Eddy, treasurer of the Flint mills, at Fall River, has resigned, the directors having disapproved of his transactions in cotton, resulting in a loss of over \$18,000. The amount is made good by gains from purchases in the spring. The weavers will ask the treasurers of several mills for 15 percent increase in wages. The carders will make a similar request.

Work on the two wings of the music hall at Cincinnati is progressing rapidly and the entire series of permanent buildings will be ready for the reception of exhibits in the seventh industrial exposition at the time specified by the commissioners. Applications for space and dates are far in excess of the previous year and come from all points of the United States and Canada.

A numerously attended distillers' meeting is in session at Peoria. Fall delegations are present from Ohio, Indiana, Illinois, Missouri and the sixth district of Kentucky, representing nearly three-fourths of all the manufacturers of spirits in the United States. The meeting is called to unite all in operation for self-protection and fair treatment. The various committees are appointed and are now in session.

The Yellow Fever. Twenty-six cases were reported at Memphis, Thursday, seven white and nineteen colored. Two deaths, and a large number of cases are reported. The expenses of the safety committee to date are \$9,645. The Howard Association has decided to issue no appeal for help until the last cent in the treasury is exhausted.

SPECULATION. Since the creation, it is estimated that 27,000,000,000,000,000 have lived on the earth. This sum divided by 27,844,000, the number of square miles, gives 1,314,522,086 to a square rod and 5 to a square foot. Suppose a square rod be divided into eleven equal parts, each part would contain 118,583,827 persons. But this is speculation, and of no benefit to the 1,000,000,000 people that now exist, 500,000,000 of whom are invalids, 33,000,000 dying each year. What they most want are the facts concerning Dr. Pierce's Family Medical Discovery for years his standard remedy for the cure of all scrofulous, throat and lung diseases, and for the cure of all diseases and weaknesses peculiar to women. For full information, see the People's Common Sense Medical Adviser, published and sold everywhere, price (post-paid), \$1.50. Over 100,000 copies sold. Address the author, R. V. Pierce, M. THE RAILROADS.

C. E. Gorham returned to Chicago last evening.

Pittsburgh Engine 157 made its first trip on a passenger run to-day.

An excursion train of eleven cars left Howard City for Rome City this morning.

Charlie Fenlon, engineer of Pittsburgh engine No. 111, returned to duty this morning.

From one to three express cars loaded with peaches, pass through this city for Chicago, on every fast train going west.

"Yank" Taylor, the Pittsburgh engineer who was in the wreck at Pierce-ton last Wednesday night, had his hearing before the officers of the road this morning.

The G. R. & I. have just bought a lot of barbed fence wire to try along their tracks. There have been so many fires along the road lately that they intend to test their usefulness thoroughly.

Wabash earnings are reported as follows: Seven months ending July 31st, \$2,376,742; corresponding period of 1878, \$2,669,425; decrease, \$192,683 or 7.5 percent; July, 1879, \$417,453; July, 1878, \$382,035; increase, \$35,418.

The net earnings of the P. & W. St. & C. R. for the year ending December 31st, 1878, were, after payment of taxes, \$3,689,196.98. The length of the road is 468.39 miles, and the net earnings \$8,000 per mile. If such earnings could be assured in perpetuity, estimating six percent and taxes on the fair worth of money, the real value of the Pittsburgh road is about \$134,000 per mile.

Face the Music.

The Fort Wayne saloon keeper who is "given away" in the following article in the Toledo Commercial might as well own up:

A saloon keeper of Fort Wayne came to the city the first of the week to attend the Singers' fest. He met some friends here, and they made a party for the animal with two tails. They went from one city to another for several days on the highway and crossways, stopping at all points where refreshments are sent to their inn. Finally they landed up at a house on St. Clair street, and, being tired with much travel, and more beer than they could take, they fell down in the hall and went to sleep. While enjoying this luxury, some one, to deprecate unknown, came along and went through one of them to the tune of a fine gold watch and chain and \$20 in money. If you had been at Fort Wayne when this man left home, you would have heard him boast, as he took his farewells, that "that none of the Toledo heath can beat me, I am too sharp for them." But he was beat.

BURNED TO DEATH.

Terrible Fate of an Allen County Woman at Locust Grove.

Nothing Left But a Few Cinders and Fragments of Charred Bones.

The SENTINEL of the 16th inst. contained the following associated press telegram:

New York, Aug. 16.—Four dead bodies were found this morning in the ruins of the hotel burned last night at Locust Grove. They were those of Joseph Pierce, W. Schuchard, Kate Rafter, a chambermaid, and Louise Cook.

Locust Grove Hotel was burned up between 8 and 9 o'clock on Friday evening the 15th inst., and on the following day the bodies of the above named persons were found in the ruins. Three bodies were

BURNED TO A CRISP

while that of Catharine Rafter, the old chambermaid, was consumed to cinders, nothing remaining whereby the body could be traced but a portion of the vertebral column and a few small fragments of charred bones. The remains were deposited in a bucket and were thus exhibited at the inquest. The only possible way that the body of Louise Cook could be distinguished from that of Miss Rafter was by steel corset bands found on the former.

Catharine Rafter was about 60 years old, and had been employed in the hotel a number of years where she was

In addition to the soap business they manufacture "The Favorite Washing Blue." Messrs. Westrumb's Troubles.

Yesterday afternoon Constable Westrumb, armed with a warrant, went to bring Frank Casso before Judge Pratt, to answer to the charge of selling liquor without a license.

Frank told Westrumb that he should go on, and tell Pratt that he would be on hand this morning. That, however, wouldn't do for Westrumb, and after some words he went for Casso, and a little ruction ensued. Officer Connors appeared upon the scene, and Casso then said he would go with Connors but not with Westrumb, and accordingly went with them to Pratt's court and gave bail for his appearance at 9 o'clock next Wednesday morning.

Westrumb says he called on Connors to go with him in the first place and he didn't go, and now he proposes to file an affidavit against him for refusing to help an officer in the performance of his duty when called upon.

The "College of Medicine."

Articles of association of the Fort Wayne College of Medicine were filed to-day in the recorder's office. The incorporators are Drs. Beck, Anderson, Gregg, Metcalf, Stemen, Gobrecht, Rosenthal, Wheelock, McCoskey and Proeger, and Messrs. A. H. Bittinger, Chas. McCulloch, Montgomery Hamilton, A. G. Trentman, H. J. Trentman, Wm. H. Dreier, R. C. Bell and H. Monning. The board of trustees for the first year consists of Mount Hamilton, A. C. Trentman, R. C. Bell, Henry Monning and Chas. McCulloch. The college, with these names, will command public confidence. It has introduced one creditable innovation, viz: the "pay as you go" system.

ANOTHER FRAUD.

The "United States Dower Association" a Humbug.

Probability That Fort Wayne Furnishes Some Victims.

An organization known as the United States Dower Association, whose headquarters are at Scranton, Pa., and Washington, D. C., is according to a Chicago paper of last week, a gigantic swindle, and a fraud of the first magnitude. Mayor Zollinger was formerly the agent of the association at this point but the SENTINEL is informed that G. L. Bittinger is now the association's agent, having succeeded Col. Zollinger.

The fact of the organization being a fraud, however, does not, neither should it, reflect one particle on the above named gentlemen, as they were in all probability gulled in the same manner as the "depositors" were. The Chicago office was closed up last week, and the agents of the company have been sued for recovery and damages, and there are doubtless parties in this vicinity who are anxiously awaiting returns on their deposits.

A SENTINEL reporter to-day made an attempt to interview the above named gentlemen, but Mayor Zollinger is out of the city, and Mr. Bittinger could not be found.

MARIA'S MISERY.

A Divorce Suit From Maumee Township.

Six Weeks of Wedded Life.

Maria Worden, of Maumee town ship, wants a divorce from Sanford Worden, and no wonder, if the story told in the complaint filed in her behalf to-day is correct. She alleges that she was married to the defendant in old Maumee on the 28th of July, 1875, but the parties only lived together six weeks, when the defendant, without cause, deserted the plaintiff and has since that time refused to live with her or to contribute to her support. Such a husband, Maria regards as worse than none, and she, therefore, asks Judge O'Rourke to grant her a decree of absolute divorce.

The SENTINEL office will be open to-night and to-morrow night.
